

## PRIMEX EXPERIENCE IN TRANSPORT

**PRIMEX** has been involved in the transport sector as an offshoot of its numerous engagements in the urban and infrastructure sector. Since 2013, **PRIMEX** has participated in the planning and feasibility study of various infrastructure projects as well as construction and rehabilitation of feeder roads and access tracks, highways and expressways with funding from Philippine Government agencies and international financial institutions like ADB.

**PRIMEX** has conducted numerous feasibility studies, project design, and was a part of the project management implementation consultant teams. In 2013, **PRIMEX** fielded transport experts for the conduct of the *Feasibility Study on the Upgrade of the Naga Airport* where consultants measured the economic and financial viability of upgrading an airport based on a projected passenger traffic. To date, **PRIMEX** is expanding its involvement in the transport sector in the Philippines and Asia, and is fielding consultants in projects involving mass rapid transit systems and development of traffic studies for road and expressways.

**In the last 10 years, PRIMEX's work in the transport sector is exemplified by the following projects:**

- Project Preparation Services for the Mindanao Railway Project, Phase III (Northern Mindanao – MRP3 Project), Philippines, December 2023–July 2024 (for the Public-Private Partnership Center of the Philippines (PPPC));
